

Epigenetic Principle

Every developmental stage inherits the successes and failures of the previous stages.

<u>Developmental Stage</u>	<u>Acquisition Goal</u>	<u>Facilitation Task</u>
<i>Infant</i>	trust/attachment	unconditional love
<i>Toddler</i>	self-control	exploration/limits
<i>School Age</i>	socialization	self-soothing
<i>Early Adolescence</i>	self-image	managing change
<i>Middle Adolescence</i>	internalization of limits	experimentation
<i>Late Adolescence</i>	integrated identity	autonomy/independence

Our kids get many chances
